Basic Information

I am an incoming **Shun Hing Postdoctoral Fellow** at the Chinese University of Hong Kong (CUHK), working with [Prof. Zhongyu Li](#). I received my Ph.D. in Mechanics & Control from Peking University (PKU) in June 2026, working with [Prof. Jinzhi Wang](#) and [Prof. Zhisheng Duan](#). From Dec-2024 to Dec-2025, I was a visiting PhD at Nanyang Technological University (NTU), Singapore, advised by [Prof. François Gay-Balmaz](#). Prior to that, I received my B.Sc. in Mathematics from Beijing Institute of Technology (BIT) in 2021 under the supervision of [Prof. Donghua Shi](#).

My research interest lies at the intersection of **Geometric Mechanics & Control**, **Physics-Informed Learning**, and **Stochastic Dynamics** for robotic and mechanical systems. I am broadly interested in leveraging physical principles and differential geometry to develop computationally efficient algorithms for **control**, **estimation**, and **learning** with sound theoretical guarantees.

Academic Experience

- | | |
|---|---------------------|
| ◦ Peking University
PhD (Dynamical Systems and Control) | Sep 2021 - Jun 2026 |
| ◦ Nanyang Technological University , Singapore
Visiting PhD (Geometric Mechanics) | Dec 2024 - Dec 2025 |
| ◦ Beijing Institute of Technology
Bachelor (Mathematics) | Sep 2017 - Jun 2021 |

Teaching Experience

- | | |
|--|-------------|
| - Teaching Assistant, “Ordinary Differential Equations”, Peking University
Undergraduate-level course, covering more than 150 students
Recieved Outstanding Teaching Assistant Award | Fall 2023 |
| - Teaching Assistant, “Linear Algebra”, Peking University
Undergraduate-level course, covering more than 150 students | Spring 2023 |
| - Teaching Assistant, “Linear Algebra”, Peking University
Undergraduate-level course, covering more than 150 students
Delivered Lecture 5 “Determinants”
Recieved Outstanding Teaching Assistant Award | Fall 2022 |
| - Teaching Assistant, “Analytic Mechanics”, Peking University
Undergraduate-level course, covering more than 100 students | Spring 2022 |
| - Teaching Assistant, “Ordinary Differential Equations”, Peking University
Undergraduate-level course, covering more than 150 students | Fall 2021 |

Publications

Preprints

- [P1] Y. Lin, Z. Duan, **T. Li**, B. Wu, and Z. Sun, On the Robustness in Data-Driven Nonlinear Optimal Control: From Stability to Optimality, under review on IEEE Transactions on Automatic Control.
- [P2] M. Du, F. Gay-Balmaz, **T. Li**, and D. Shi, Stochastic Geometrically Exact Beam: Continuous-Time Geometric Principles and Variational Discretizations, to be submitted.

Honors and Awards

◦ National Scholarship (top 1%) Issued by Ministry of Education, China	Sep-2025
◦ Merit Student of Beijing Issued by Beijing Education Commission	Dec-2025
◦ Presidential Doctoral Scholarship (The most prestigious scholarship issued by Peking University)	Jun-2025
◦ China Scholarship Council Visiting PhD Scholarship Issued by China Scholarship Council	Jul-2024
◦ Merit Student Award (top 1%) Issued by Peking University	Sep-2025
◦ Excellent Academic Research Award (top 1%) (only 2 awardees at SAMR, Peking University)	Sep-2025
◦ Dean's Doctoral Scholarship - First Prize Issued by College of Engineering, Peking University	Oct-2024
◦ Yuehua Luo Scholarship Issued by Peking University	Nov-2024
◦ Outstanding Teaching Assistant Award (× 2) Issued by College of Engineering, Peking University	Mar-2024 & Apr-2023

Conference Talks & Invited Talks

- Variational Principle for Stochastic Nonholonomic Systems Part II: Stochastic Nonholonomic Integrator
The International Conference on Geometric Science of Information (GSI)
Saint-Malo, France, Oct-2025
- Variational Principle for Stochastic Nonholonomic Systems Part I: Continuous-Time Formulation
The International Conference on Geometric Science of Information (GSI)
Saint-Malo, France, Oct-2025
- A Structure-Preserving Learning Scheme on $SO(3)$
The 43rd Chinese Control Conference (CCC)
Kunming, China, Jul-2024
- Multisymplectic Unscented Kalman Filter for Geometrically Exact Beams
International Conference on Geometric Science of Information (GSI)
Saint-Malo, France, Aug-2023
- A Physics-Informed Gaussian Process Regression Algorithm for the Dynamics of the Planar Pendulum
The 42nd Chinese Control Conference (CCC)
Tianjin, China, Jul-2023
- A Statistical Dynamical Algorithm for the Dynamics of Gaussian Distributions
The 34th Chinese Control and Decision Conference (CCDC)
Hefei, China, Aug-2022

Academic Service

Journal Reviewer: Automatica, International Journal of Dynamics and Control.

Conference Reviewer: IEEE Conference on Decision and Control (CDC), IFAC Workshop on Lagrangian and Hamiltonian Methods for Nonlinear Control (LHMNC), International Symposium on Mathematical Theory of Networks and Systems (MTNS).
